

# Dana Companies Safety Policy

Our most critical *Quality* requirement is our commitment to fully integrate Environmental, Health, Safety and Security (EHS&S) concerns into our management principles, systems and practices and to sustain these concerns. We do this by...

- Establishing and publishing annual EHS&S goals.
- Senior Management's confirming, supporting, and promoting these goals.
- Periodically reviewing performance against these goals.
- Communicating EHS&S performance results with our Stakeholders.
- Holding all associates responsible for these goals and results.
- Continually improving our EHS&S performance.
- Responsively meeting or exceeding EHS&S customer, regulatory, legal and other external and internal requirements.
- Doing "right things right," the first time.

Ronald B. Dana
