April 17, 2013

Dana Transport

The Dow Chemical Company is pleased to recognize Dana Transport for the safe and secure transportation of Dow products during 2012 by presenting your team with Dow's North America Gold Road Carrier Safety & Security Award. The Gold Road Carrier Safety & Security Award represents your company's success in achieving zero serious, moderate or minor carrier-caused transportation incidents.

Through the continuous work of your company, you have demonstrated dedication to improving transportation safety and security for your employees and for the communities in which you operate. Awards are granted at two levels based on the combination of shipment counts, incident history and safety & security performance.

- Gold – No serious, moderate or minor carrier caused transportation incidents
- Silver – No serious or moderate carrier caused transportation incidents (meets Dow's 2015 Transportation Safety Goal), and no more than one carrier caused minor incident/10,000 shipments.

Dow recognizes the significant combined efforts required by your entire team to accomplish this level of excellence. This outstanding achievement clearly demonstrates your great performance and commitment to transportation safety and security. Congratulations – we look forward to your continued success!

Sincerely,

Brenda Baker
